A series of pyrazolopyrrolone derivatives were prepared and tested in vitro for their cytostatic and neuroprotective activity. Biological evaluation of the synthesized compounds was performed in V79 cell line, primary glial cultures, and SH-SY5Y neuroblastoma cell line, as well as in rat brain neurons, striatal cultures. Cytostatic and neuroprotective activity of the tested compounds was evaluated by the viability staining and cytoskeleton polymerization assays. It was established that neuroprotective activity of the tested pyrazolopyrrolone derivatives was dependent on the presence of the nitrogen atom in the 1-position of the compound. The most potent derivatives were those with 2-chloro-1-pyrazolyl substituent, and these compounds were also neuroprotective in vivo. The synthesized compounds are characterized by high activity as anticancer and neuroprotective agents. They may be promising agents in the development of anticancer and neuroprotective drugs.Q: Android: How to get Multiple listview from oncreate I'm creating this app for my class, I have 3 listviews in a fragment, and in the oncreate i want to call all 3 to call an external function. This is the fragment oncreate code: @Override public View onCreateView(LayoutInflater inflater, ViewGroup container, Bundle savedInstanceState) { // Inflate the layout for this fragment View view = inflater 2d92ce491b
