A: There is no way to tell from the data you provided if you are licensed. You will need to contact customer support of your license provider. A: While the user id 11nb may be telling you you need to request a license key if you want to use IDL7, it doesn't tell you which license is required for which product. This can be a bit tricky, because there can be multiple licenses, and some license keys are not compatible with some products, and some products can't use some keys. The best way to get a list of these is to look at the license key list at the bottom of the UCL online system. For instance, the UCL home page says that Slicer 3.4 (as of July 2019) requires license key 147. This can be confirmed by looking at the system notes for Slicer 3.4, which says "Installation is not allowed unless an ENVI license key 147 is. 1. Field of the Invention This invention relates to a method of preventing the formation of deposits in the interior of water passages or channels, such as pipe lines, in which deposits in such passages, especially calcium carbonate, may form, by passing a prescribed concentration of, or a stronger solution than, such water to pass through such passages in a predetermined period of time. 2. Description of the Prior Art The formation of calcium carbonate deposits is a common problem in many water systems. The problem of depositions in water systems has become particularly troublesome due to the increased use of reverse osmosis systems. Most of the commercial reverse osm
