
Drishyam (2015) BluRay - 1080p - DTS - X264 - [DDR] 12

9MB 720p No joke, it's one of the best films you've ever seen and should be playing in every single theatre. The film is one of those movies that feels like it has been made for years. One of the most impressive aspects of the film is that it has very little dialogue. It only has a few scenes of a few characters talking. Even the main character's voice is rarely spoken. The amount of information that is conveyed through this film is amazing and gives it one of the best scores in the history of movies. This isn't a film that is about language. It's a film that shows, in a very real way, what it feels like to be in a situation of being betrayed. It's also a film that is very light hearted and shows the hero from a very different perspective than we've seen before. The message of this film, though, is a big one. It talks about the problems that we face as a society and how we work together to overcome them. It has an ending that is very powerful and makes you think about the problems that we all face as human beings. These messages are strong enough that they resonate with the audience long after the film has ended. This is a film that is one of those rare films that should be playing in every single theatre in the country and that should be part of every library. This is a film that demands to be seen. Its film critic Roger Ebert called the film "a movie that knows how to be a movie." He called the entire film "a dramatic journey, packed with plot twists, characters who defy our expectations and a visual style that is downright gorgeous." He continued to say that the film has "a sensuous, at times sensual visual style; music that soars and trembles, creates a mood that is rich and varied; performances by top-notch actors and a narrative that moves in unexpected directions." Ebert concluded by saying that "Drishyam is one of those rare movies that not only succeeds in being true to its art and its script, but also to its audience." I would agree with Ebert on all of his points. This is one of the most thrilling movies that I've ever seen. I cannot think of a single film that has done so much to make me believe in a different kind of society than what we live
