The transition between the fine-structure constant $\alpha(R)$ approximately $1/137$ at the scale of the known Universe and $\alpha(0)$ approximately $1/137$ at the Planck scale, which should be a fundamental physical constant, remains an unsolved problem. In this Letter, we present an experimental study that yields $\alpha(0) = 1.20(7)$ with a precision of 1 part in $10(9)$. The result is based on a precise measurement of the resonance Zeeman splitting of the $n = 3$ state of the ground state of heliumlike uranium.Oshkosh Insurance Policy with High Speed Drive and the C1505 lube air filter. You've got a new Oshkosh commercial truck! The Oshkosh commercial vehicle insurance policy covers any damage to your truck up to \$100,000 and is designed to provide you with piece of mind in the event of a loss. If you have a commercial vehicle and want to ensure that your truck is safe, comfortable and clean, the C1505 commercial air filter lube is the perfect way to do that. C1505 lube air filters have been successfully installed in tens of thousands of vehicles over the last few years. How Does an Air Filter Lube System Help a Commercial Truck? Oshkosh commercial truck drivers are concerned about the performance of their trucks and want to ensure that they're in the best shape possible. The air filter and filter lube air filter combination is a simple and easy way for commercial truck drivers to keep their trucks in top condition. When you lube an air filter with filter lube, you can help to keep the dust and dirt that you inhale in your truck to a minimum. A dirty air filter leads to a dirty truck and that means a dirty driver. Why choose C1505 Commercial Air Filter Lube? When you install the C1505 lube air filter in your truck, you're immediately helping to make your truck cleaner and more comfortable for your drivers. The C1505 is made of industrial quality materials and is made to stand up to heavy duty use. When you install the C

As a newly discovered genus, "Paenibacillus" species have been isolated from various sources, such as soil and water ([@B2]). "Virgibacillus" species have been described as industrial important probiotics ([@B3]). "Paenibacillus polymyxa" is a Gram-positive bacterium that has been isolated from a wide range of environments such as lake sediments and agricultural soil ([@B4], [@B5]). The bacteria are widely used as a probiotic in the aquaculture industry ([@B6]) and have been identified as an anti-nematode probiotic in aquaculture, disease management, and biofertilizer applications ([@B7]). "P. polymyxa" was reported to be resistant to high temperatures and thus has a greater potential for application in cold environments ([@B8]). In addition, "P. polymyxa" was also identified as an antagonist to Fusarium head blight in maize ([@B9]). There is a large body of data on the genomic characteristics of "P. polymyxa" ([@B10][@B11][@B12]). Recently, the genome sequence of "P. polymyxa" US89A (GenBank accession no. AP004232) was published ([@B13]). The whole-genome sequencing of strain Y-2 was performed by using the Illumina GAIIx system at Shanghai Majorbio Bio-pharm Technology Co. Ltd. The sequencing library was prepared according to the manufacturer's instructions and sequenced with the pair-end (PE) strategy (Illumina). A total of 74,852,168 raw reads (average length, 90 bp) were generated. These raw reads were filtered by the software FASTQ-GUI (Version 0.9.5), using the default parameters ([@B14]). After filtering, the retained reads were assembled "de novo" using Velvet (2092ce91b
