Freezing or hanging the Kodak Capture Pro software This usually happens when you click the "Enter" button of the software. To repair this, you can do one of the following: 1. Press the "Reset" button or the "Reload" button (If you pressed the Reset button before, then you can press the Reset button again and try the Load button) 2. If the operation is more than three minutes, just close the software, turn off your PC and restart. 3. If the operation is less than 3 minutes, you can check your PC for viruses, spyware and/or malware and clear them by using an anti-malware program. 3. If the operation is less than 3 minutes, you can start Capture Pro software again from the "Start" menu. For some versions of the software, such as 4.0, the installation file cannot be found. To fix it, you can download the latest software from our website: www.kodak.com/support and install it. Note: If you are getting the wrong version of the Capture Pro software, then you need to download the latest version from www.kodak.com/support. Capture Pro software keys of success capturepro.com.
