What's New In PaperCut NG?

Publisher's description: The functionality and ease of use which make PaperCut NG so popular and customizable are what make it so unbeatable. PaperCut is a smart and easy-to-use tool for administrators. PaperCut NG is the next generation, and more

powerful version of PaperCut which is very easy to use. It includes all the most important functions you ever need. It can be installed on your PC (32bit or 64 bit), Server, or Mac and other "machines". The settings that are unique to PaperCut NG are clearly displayed. You can modify these, as well as all of the configuration changes which have been implemented in the "standard" PaperCut (PaperCut NG). With PaperCut NG, you can specify a Color Depth for the printers in

your network. The larger the color depth, the better the quality of the printout. You can assign colors directly to the currently selected printer. How It Works You can move around your documents, spreadsheets, presentations, photos and drawings in PaperCut NG using a simple mouse click, or drag and drop. As PaperCut NG is an online service, you can create and edit documents right on the web pages, without installing a software. You can print documents from anywhere in your

network. The quick development of this software system allows for dynamic, one-way integration with a wide range of applications, including Microsoft Office, as well as any other programs that you can download and install.

Why You Need PaperCut NG In the past, PaperCut was one of the best, more than adequate software system for those who wish to monitor and manage printers. The development of this software application by the manufacturer is primarily oriented towards

programmers. That's why it features a very well-thought out user interface that will let you to easily work on your network servers, locally print to any supported color device and remotely monitor your printing equipment. PaperCut NG has a number of unique features which are not only useful, but which can in fact significantly improve the performance of your network. With the help of PaperCut NG, you can monitor server and local printers, as well as restrict user

access to them. This is a comprehensive software application that can be launched from a web browser. Installer and initial configuration The setup operation take a while to finish, and you can select the components you want to install between the primary server, secondary print server, web print server (sandbox mode) and site server. At the first run

System Requirements:

Mac: OS X 10.6 or later 1 GHz
dual core Intel processor 4 GB
RAM 1024x768 display 2 GB
available space for installation PC:
Windows 7 or later Please try the
installer on a secondary machine
before installing on your main
machine. Mac users: You must
have a serial number to activate
the software after installation
