Q: Set cursor to the end of the string for the next time I have a multiline textbox and every time user clicks on the textbox the cursor goes to the end of the textbox. I want to to automatically the cursor to the end of the textbox if user is not the end of the line and it is not active. A: This is a Windows behavior so I don't think you can really change it through code. I suggest you find and use a different text box control if you really want to change the cursor position. Q: Custom URL in SMTP Access from different PC I have an website that is hosted on webhost.com. I am currently using a custom domain for it: mywebsite.com I set up the DNS records for it to point to my webhost.com and the domain has been verified on the email I use. I have an email account with gmail.com for an email that is not the main one for the site, it is a different account so I can use that for my other emails. I want to be

able to configure my email server to send the emails from the custom domain. So it looks like this: mywebsite.com@gmail.com So how do I go about configuring my email server to allow this type of URL? Thanks! A: So how do I go about configuring my email server to allow this type of URL? Set up SPF records for mywebsite.com. Check that SPF is enabled for the domain. Check that SPF is not a Reverse IP Lookup. If reverse lookup is not enabled, add the following IP record. A 86400 (4 hours) TTL to verify that the IP is owned by mywebsite.com. Forward IP records for mywebsite.com. Check that all the email servers that send emails from this domain use the same IP address. Rising threats of marine pollution raise concerns Oct 15, 2010 The Ocean Health Index (OHI) released by the Blue Frontier Campaign highlights that the health of the world's oceans are rapidly deteriorating. The Blue Revolution is the name for the transition to sustainable practices by the world's leading

economies that will be required to protect the ocean from further degradation

Share your drawings with anyone, anywhere. Send PDFs to people with just a few clicks. (video: 2:15 min.) Use a collaborative CAD drawing tool to import, annotate and comment on user drawings. Import and collaborate with other users on the same drawing. (video: 2:45 min.) Enhanced multi-layer display. Easily navigate among all layers on the drawing board. (video: 4:30 min.) New PDF Export Functionality: Save time when exporting your PDFs to paper. Exporting a drawing to PDF gives you two choices: Save the drawing to the clipboard (with the drawing data included) or save the drawing data separately. Easily switch between the two export options, and export to PDF in an instant. (video: 0:30 min.) Support multiple layers per

drawing. Easily toggle between viewing the layers individually and viewing all layers at once.

(video: 0:40 min.) Bugs fixed in AutoCAD 2023: AutoCAD 2019/2019 Update 1, 2019 Service Pack 3, and 2019 Software Update 2 installations.

Optimized workflow for working on large drawings. Improved performance for large drawings when using very large user preferences.

Decreased interaction latency. Review autoCAD

2019 Release notes: AutoCAD 2019 was released in October 2018. If you're running AutoCAD

2019, read the release notes for 19.0. AutoCAD

2019 introduced a new user interface (UI). If

you're working with a PC, you can use any of several key combinations to switch between the

new UI and the previous UI. For example, you

can press **Ctrl+Alt+UpArrow** to move the cursor to the top of the drawing, and then press **Enter** to

return to the previous UI. For a Mac, press

Command+Option+UpArrow to move the cursor to the top of the drawing, and then press **Return**

to return to the previous UI. To access the new UI, you must first use the nUI command. For example, to switch to the new UI, type `nui` or, if you're using a Mac, type `Command+Shift+Alt+UpArrow`. To return to the previous UI, type `nui` or, if you're using a Mac, `Command+Shift+Return`. If
