Rajeev: 01-07-2012, 12:45 AM Inthelink is not having a vendor driver for the device. You can use the GDT driver for any Windows version starting from XP. I would suggest trying to get the device detected and running with the free GDT driver for Windows. chandar: 01-14-2012, 10:01 PM is there any other work around in the mean time or i have to install a new driver like adobe flash player. chandar: 01-14-2012, 10:06 PM

To study the clinical features of a Chinese family with primary dystonia parkinsonism (PDP) and investigate the possible pathogenic mechanisms. Twelve members of the family including 5 patients with PDP were examined by assessing the symptoms, gene mutations and pathogenic mechanism. Twelve patients (7 males, 5 females) had a mean age at onset of 54.0 (31 - 76) years. All patients had dystonia of the limbs, trunk and face before the parkinsonism developed. The dystonia had a variable onset, from the age of 40s to late in the 80s. At an average interval of 10.9 (1 - 22 3e33713323
