I have a simple script that changes the value of a variable and stores the value back. On the HTML page I have a timer in javascript that checks every minute if the value of the variable has changed. This variable is also used by a function, so every time the variable is changed I want to call the function too. What is the best way to do this? `document.getElementById('root').onclick = function() { var myVar = 5; var setVar = function() { var changeVar = myVar + 10; document.getElementById('root').innerHTML = changeVar; }; setVar(); myVar = changeVar; setVar(); }; A: You`

What's New In?

Alive MP4 Converter is a simple-to-use tool which allows you to convert videos of various extensions, including AVI, MOV, MP4, MPG and 3GP. The application comes with a user-friendly interface in which you can import videos via the file browser only, since the "drag and drop" method is not supported. Batch conversions are possible. In the queue you can check out the source, size and output destination of each file. In the "Options" area you can select the output format and destination (same as the video or other), and initiate the conversion process. But you can also modify audio and video parameters regarding the frame size, frame rate, bit rate, sample rate and channels. Settings can be restored to their default values. In addition, you can enable Alive MP4 Converter to overwrite existing files without prompt, delete the target file when canceled, save the file list for further use, to delete the source files after finishing the tasks, and others. Last but not least, you can schedule conversions on any day of the current week, save the current project, as well as set the tool to exit or to shut down the computer once all encoding jobs have been completed. Alive MP4 Converter has a step-by-step tutorial with snapshots for beginners and quickly finishes a task while using a low-to-moderate amount of system resources. No errors have occurred during our tests, since Alive MP4 Converter worked smoothly. It also manages to preserve a very good image and sound quality in the output clips. Putting aside the outdated interface, we strongly recommend Alive MP4 Converter to all users, no matter how experienced they are. Screenshots:
