Adobe has taken some of the most valuable and powerful features from the previous version of Photoshop and moved them into its most popular digital painting product, Photoshop Elements. Cytomegalovirus infection in non-Hodgkin's lymphomas and Hodgkin's disease. Serial serum samples obtained from 45 patients with non-Hodgkin's lymphomas (NH-L) and 17 patients with Hodgkin's disease (HD) were assayed for cytomegalovirus antibody (CMV) titer by the immunofluorescent antibody technique. All of the patients had been taking the CMV hyperimmune globulin (CMVIG). No serological evidence of a CMV infection was found in any of the samples taken during the hospital stay, except for the 25% of the patients with HD who had received low-dose cytotoxic therapy (LDCT). Only 4 of the 29 patients with NH-L and 2 of the 18 patients with HD had, on admission, an undetermined titer of CMV antibody. The other 25 patients (22 with NH-L and 3 with HD) had a determined level of CMV antibody. A titer of 1:64 or more was found in all but two patients with NH-L: one had a titer of 1:64 and the other a titer of 1:80. In contrast, no patient with HD had a titer of CMV antibody that was higher than 1:32. The results showed that there were no significant differences in the titers of CMV antibody present in patients with NH-L and those with HD. Also, there were no significant differences between the serum CMV antibody titers in patients with NH-L who died in the hospital and those who were discharged after intensive chemotherapy. Q: The box-shadow is not working in IE I'm using the box-shadow property to add a shadow to my navigation element. I've got a problem with IE. Shadow works fine in Chrome, and another browser, but in IE, a shadow is just not showing in any IE version. My code: This is what I'm using: navigation { height: 60px; margin: auto; padding: 0 10px; text-align: left; -webkit-box-shadow: 0 5px 15px 0 rgba(0, 0, 0, 0.3); -moz-box-shadow: 0 5px 15px 0 rgba(0, 0, 0, 0.3); box-shadow: 0 5px 15px 0 rgba(0, 0, 0, 0.3); } How I use it: Please, check this Because I don't have a good explanation, I made a fiddle example for better understanding. This is because these securities tend to have favorable tax and trading attributes, and yield a nice dividends. However, should you decide to go to the next level, ETFs actually aren't your only choice.
