The effect of adenine on resistance of *Pseudomonas aeruginosa* PAO1 to polymyxin was studied. It was shown that adenine increased the resistance of the organism to the polymyxin at its IC50 and IC90 levels, as well as reduced the ADPase activity in the cells. The influence of adenine on the bactericidal action of polymyxin was also observed. It was found that polymyxin did not exert any effect on the growth of the organism at the concentrations of 30, 60 and 180 micrograms/ml.Q: What should our FAQ contain?
