Developed by EA Canada, FIFA is the biggest game in the FIFA series. Available on consoles and PC, the game is a true title of innovation and is highly acclaimed by the most hardcore of FIFA fans as well as by casual gamers and newcomers. The game allows real players and real matches to be fully recreated and is a testament to the high quality of EA's development team who bring the full package to life in stunning detail. The game packs the excitement of the big 5 a-days, the drama of cup finals, the entertainment of festive international tournaments and real-world stadiums that are so close to the real thing they feel real. FIFA is the ultimate football experience and is available on the PlayStation 4 and Xbox One. The Xbox One X Enhanced edition of FIFA brings the game to life in even more detail. Featuring 4K UHD, high dynamic range support and smoother framerates, the game is an absolute must-have for all Xbox One owners who want the most immersive, authentic experience. Featuring all the FIFA 24 games modes, licensed leagues, all-new stadiums and enhanced gameplay, FIFA returns to the series with an all-new gameplay engine, UGC Pro Engine, FIFA Legacy (the original classic mode) and Revolutions. Gameplay Football (the real kind) is back and better than ever with FIFA 22. New gameplay innovations have been added such as the ability to run for up to 30 metres after a possession has been lost. Quick-play allows for some fast-paced, last-ditch, breakaway action to spice up team-shuffles and penalty shoot-outs. FIFA has always been at the forefront of its genre; developing the most detailed game engine possible to recreate every nuance and aspect of football. FIFA 22, EA SPORTS' most technically advanced FIFA title yet, will deliver a deeper, more compelling and highly-polished football game to fans. With a brand-new physics system that can be set to adjust the accuracy of the ball based on factors such as weather conditions or ground conditions, the game now brings physics simulation of the ball into all aspects of the game, to provide authentic, realistic ball-in-hand and pass-in-hand interactions. The new player reaction system will make both defenders and attacking players defend their area and try to win the ball back more aggressively, in a bid to keep the player in possession.
