FIFA is the world's biggest, most widely known and best-loved soccer video game series. The FIFA franchise has now sold more than 77 million units across all platforms worldwide since the first FIFA was released on the Sony PlayStation in September 1996. The core gameplay of any FIFA game is the same: take control of a user-controlled professional or amateur soccer team and compete in regular matches against other teams or the AI. During the match, players on the pitch are controlled by either pressing buttons on the controller, punching buttons on the menu system or a combination of both. New gameplay features have been introduced in every FIFA game, and this newest instalment will introduce new gameplay mechanics that make you feel like an unstoppable soccer beast on the pitch. Players and teams come from all over the world to compete in the biggest club matches - the UEFA Champions League, UEFA Europa League, FIFA Club World Cup, The Barclays Premier League and a host of other global competitions - using the most up-to-date science-based data and processing to bring each team to life. With FIFA 22, we also introduce many new features and game modes. There's an updated Transfer Market with new characters, thousands of new tactics to use in-game, improved player AI and more. In addition to the new features, we've reintroduced classic features that have been missing since FIFA 13 such as the Fight for the Ball, which returns from FIFA 10, and the new Empower-Up system, which enhances your ability in the game. A new Player Health System will make you feel more in control of the game with smarter injury, fatigue, and heartbeat simulations. A new AI Strategy will allow you to create your own system of play which will change the way your team creates and executes its plays on the pitch. New Goalscoring Mechanics include an even more dynamic Goal Teaming System and more accurate ball physics. Features: - New Game - New Way of Play - New Take on Authenticity - Real-World Data An unparalleled gameplay engine brings the FIFA experience to life like no other sport game. The game engine itself is a new first for the franchise and handles all movements and collisions with incredible accuracy. Players on the pitch are controlled with individual control systems that allow us to capture the nuance and balance of every player on the field. With all 29,000 players in the game, we have over four times more data
