(i was about to post the link for the download of the bootable drive). i have used the ubuntu 16.3lts installer cd to

install the bootable drive on the computer but the computer still boots to the hard drive only. i have tried to create a bootable drive on a different usb flash drive but the computer still boots to the hard drive only. i cannot get the computer to boot from the bootable drive. i have tried various usb flash drives and have found out that if i install the bootable drive to a flash drive with the size of 2 gb or smaller it will boot from the flash drive. if i try to install the bootable drive to a flash drive with the size of 4 gb or more the computer will not boot to the flash drive. 5ec8ef588b
